Batik is a cultural heritage that has existed for generations ,Batik Garutan has been known as one of the known types of batik that have form of motif pattern inspired by philosophy regarding life social culture of the Sundanese people and often developed into a fashion that is often used at certain events. In the development of the batik motifs themselves, most of them are inspired by animal and plant pattern, but not many motif pattern have been developed by regional specialties itself, so this can be an opportunity that can be developed further.To provide more value to Batik Garutan itself, it can be made into a product using zero waste pattern cutting Method that can minimize fabric waste.

Keyword: Garutan , Batik Technique, Zero Waste Pattern Cutting.
