

ABSTRACT

Visi Maha Karya Foundation was moved to run a social program that aims to give the main attention to the existence of people with physical disabilities which is manifested in a movement called "Kakiku Kini Kembali", That is a program that invites all corporate parties to care for people with physical disabilities, especially those from the underprivileged (pre-prosperous) by giving them prosthetic hands or legs and also providing training, and is also expected to be able to compete and get better opportunities. equal in obtaining employment.

In the Final Project entitled The kakiku kini kembali it was created to assist the "Visi Maha Karya Foundation in carrying out the "Kakiku Kini Kembali" program movement by providing information related to these activities based on the Android application. In this application, there is information about the foundation in the form of foundation activities, articles, account numbers for donations, requirements for applying for assistance, and an explanation of the "Kakiku Kini kembali" program.

With this application, it is hoped that the foundation can be helped by the way the public can find out information about the "Kakiku Kini Kembali " program from the Visi Maha Karya Foundation without having to go directly to the Visi Maha Karya Foundation.
