The Regional Library and Archives Authority of West Java Province has a public library operated by the government. This library was highly requested by the public as a result of the visit, and the response was very positive. The library itself is a place to store and provide information and literature resources to serve all needs, the purpose of the library itself is to help the community in education. However, libraries and repositories in West Java have problems providing facilities such as private rooms, convenient user facilities, and facilities for people with disabilities. The development of the present times affects the way of life or way of life, thus influencing the change of behaviors and activities in the library today. This problem was then translated into the concept of a library redesign. The concept raised is that MAZE is a simple game that trains the ability to find solutions, trains patience, and trains creativity in finding solutions. This concept should create an interior design by applying fun behaviors and activities to entertain, educate, learn and socialize.
