

ABSTRACT

Al-Multazam Mosque is one of the mosques in Bandung. This mosque is located in Cherry Field housing, Ciganitri, Bojongsoang sub-district, Bandung regency. Al-Multazam mosque's finances are obtained from the income of Friday charity boxes, infaq, and shodaqoh. In addition, there are funds spent for certain activities. Al-Multazam mosque's finances are obtained from the income of Friday charity boxes, infaq, and shodaqoh. In addition, there are funds spent for certain activities. The financial records of the Al-Multazam mosque, the information submitted is not yet valid because the financial grouping is still manual using MS Excel. In writing this final project the research method used is the SDLC Prototype method. SDLC Prototype is used to provide an overview to software users regarding software specifications for software development. This application is implemented using the PHP programming language and MySQL database. This final project produces an application capable of calculating mosque income, calculating mosque expenses, displaying input transactions into the format of general journals, ledgers.

Keywords: financial information, DKM Al-Multazam, Expenses, Income, PHP, MySQL.
