

Abstract

Every Indonesian citizen has the same right to obtain quality education in accordance with Pancasila and the 1945 Constitution. SMAN 3 Taruna Angkasa Madiun is a high school that implements a special curriculum for aerospace and state defense. To support SMAN 3 Taruna Angkasa Madiun to function as a school that adopts the existing education system in the Indonesian Air Force, ideally, it should be supported by facilities and infrastructure in accordance with the Regulation of the Minister of National Education No. 24 of 2007 concerning Standards for Facilities and Infrastructure for SMA. For this reason, it is necessary to redesign the interior to meet learning needs that are tailored to the activities of school users. The stages of data collection carried out are interviews, observations, field studies, and literature studies. The results obtained are the redesign of the interior of SMAN 3 Taruna Angkasa Madiun that meets the needs of users by applying an activity approach that is applied in a functional and effective room and based on the standardization.
