Pandawa Beach in Bali is one of the most visited tourist destinations because of its beautiful view. Therefore, this beach needs to be managed by the local authority in Kutuh Traditional Village community. Destinations like this certainly require an accommodation for both the local and foreign tourist. This is a project of a 4-star Beach Resort located in Timbis Street, Kutuh Tradisional Village, South Kuta, Bali. This resort consists of 30 villa units and all facilities according to 4-star resort standards. This project is started by its cultural issues, natural conditions issues, and popular trends that happen in Bali during the new normal. Solutions to these issues is a concept called Cultural Craftmanship in Tropical Ambience, which mean a handful of cultural transformations of many Balinese craftmanship wrapped in a tropical atmosphere of the Bali coast. The final result of the design in Seaside Cliff Resort is expected to be able to attract people's interest to appreciate, maintain, and learn more about traditional Balinese culture as a form of preserving what has been passed down by our ancestors.
