

ABSTRACT

Turtles or known as testudinata is one type of reptile that is widely kept, especially in Indonesia. One of the most widely sold turtles in Indonesia is the type of water turtle, namely the Ambon turtle which is an endemic animal to Indonesia, this shows that the interest of the Indonesian people in maintaining turtles, especially Ambon turtles. there is no terrarium product made specifically for the Ambon tortoise, and in general, hobbyists keep the Ambon tortoise inside, even though the use of an aquarium is not appropriate to maintain the Ambon tortoise, therefore special terrarium planning is needed for the Ambon tortoise. This design will use the Design Thinking approach method. The result of this design is a terrarium with features that can meet the needs of the Ambon turtles. Ambon turtles and also data on the difficulties experienced by hobbyists in maintaining Ambon turtles.
