

## LIST OF FIGURES

2.1	Manufacturing of Steel (Source : mcrsafety.com). . . . .	6
2.2	Deep representation by digit classification model [1]. . . . .	7
2.3	Convolution layer process with input data (a), filter (b), and result (c). . . . .	8
2.4	Illustration of Activation layer. . . . .	9
2.5	Pooling Layer with max pooling and average pooling. . . . .	9
2.6	Multistage System Design [2]. . . . .	11
2.7	Multistage deep learning algorithm [2]. . . . .	11
2.8	The architecture of Faster R-CNN [3]. . . . .	12
2.9	The architecture of Cascade R-CNN [4]. . . . .	13
2.10	Macro Design: Recursive Feature Pyramid. [5]. . . . .	14
2.11	Micro Design: Switchable Atrous Convolution. [5]. . . . .	15
2.12	ResNet Building Block [6]. . . . .	15
2.13	The architecture of ResNet [6]. . . . .	16
2.14	<b>Left:</b> ResNet Building Block. <b>Right:</b> ResNeXt Building Block [7]. . . . .	17
2.15	ResNeXt Dimension [7]. . . . .	18
3.1	System Block Diagram . . . . .	19
3.2	Example data set defect of surface steel from NEU [8]. . . . .	20
3.3	Example Crazing from NEU [8]. . . . .	21
3.4	Example Inclusion from NEU [8]. . . . .	21
3.5	Example Patches from NEU [8]. . . . .	22
3.6	Example Pitted Surface from NEU [8]. . . . .	22
3.7	Example Rolled in Scale from NEU [8]. . . . .	23
3.8	Example Scratches from NEU [8]. . . . .	24
3.9	Pre-processing proses . . . . .	24
3.10	Resize Image of Datasets . . . . .	25
3.11	Flowchart training and testing . . . . .	25
3.12	Flowchart training . . . . .	27
3.13	Ilustration of pyramid levels of FPN [5] . . . . .	27
4.1	Diagram Comparison Faster RCNN . . . . .	36
4.2	Defect Inspection Steel Surface Result. . . . .	38
