

## **FOREWORD**

*Assalammualaikum Wr. Wb*

All praise and gratitude for mercy and grace from Allah SWT, who has allowed the writer to complete the final project entitled “Human Follower Quadcopter Drone Based On Face Recognition For Security Vlog” as best as the author could deliver. Completing this Final Project is mandatory for obtaining a Bachelor’s degree in Engineering from the Electrical Engineering Study Program at Telkom University.

The author would like to thank those who have provided support, direction, and input in arranging this Final Project. The author realizes that the composition for this final project is still far from perfect. Therefore, the author apologizes for any shortcomings in composing of this Final Project.

The author hopes this final project can be useful and provide readers and writers more insight. The author is very accepting of input in the form of criticism and suggestions, which allows the author to build a better character and professionalism as well as to improve the quality of this undergraduate thesis.

*Wassalammualaikum Wr. Wb*
