Baitul Hidayah Islamic Boarding School is one of the Islamic boarding schools in the city of Bandung, located on Panyandaan Hill, Mandala Mekar, Cikadut, Kec. Cimenyan, Bandung Regency, West Java. With the design goal of providing facilities based on needs and providing a comfortable atmosphere in accordance with the activities of each room, the design of the Baitul Hidayah Islamic Boarding School uses the Japanese Cultural Analogy approach. The problems with the facilities and space requirements are not appropriate. Given these problems, Islamic boarding schools want to update the facilities and space requirements accordingly, but space requirements have not been able to support the development of Islamic boarding schools, one of which is the need for space based on the atmosphere of the Islamic boarding school space which influences the activities of the students. So that this redesign is carried out based on the atmosphere of space which is based on the activities and needs of Islamic boarding schools. Which is based on the location of the Islamic boarding school which is in the highlands so that adjustments are needed in the use of materials. It is hoped that the results of this redesign will be able to answer the problem and can become a reference in the development of the interior of the Islamic boarding school. By carrying out the theme raised, namely the Sunnah of the Prophet Muhammad SAW. This theme was raised because Islamic boarding schools are identical with religion, and activities are based on the Sunnah of the Prophet and Apostles. So that the atmosphere that is expected in this design is to be able to provide comfort for students in their activities so that they can focus on self-development at the Baitul Hidayah Islamic boarding school, Bandung.

Keywords: Islamic Boarding School, Japanese Culture Analogy, Prophetic Sunnah..
