

ABSTRACT

UPT Library-ITENAS is one of the facilities provided by ITENAS for- ITENAS residents as a means of education and information resources. The strategic location is located around ITENAS College. However, the fact is that the ITENAS Library Unit currently does not meet the National Library Standards and does not have facilities that can accommodate the needs of students. In response to this, it is necessary to strive and review the design of the UPT Library ITENAS Bandung. With that, the goal arises to redesign by seeing how the ITENAS library is operational for now and develop it into a Higher Education Library that has renewable facilities with the concept of a smart library so that it can become a more effective and efficient library for ITENAS students. In collecting data, design using observation methods, interviews, literature studies, and comparative studies. For-design using--programming methods, themes and concepts as well as the final result in the form of design outputs.

Keywords: Redesign, College Library, Smart Library.
