Ancient House in Bitombang Village has characteristics that signify the activity, identity and social and cultural values of the community. The purpose of this research is to examine the zoning and meaning of the Ancient House of Bitombang Old Village. The research location is in the Bontoharu Islands District, Selayar Regency. This type of research is qualitative using phenomenological methods, the process of collecting data through observation, in-depth interviews, and document studies. The research object was an old house in Bitombang Village, selected from several ancient houses in Bontoharu District, Selayar Islands Regency. The research used purposive criteria sampling technique. Data analysis uses descriptions, then the results of the discussion are associated with relevant theories as theoretical insights.
