

## **ABSTRACT**

*Faculty of Teacher Training and Education at Tunas Pembangunan University is one of the private universities in Indonesia. One of the requirements for the establishment of a university is supporting facilities and infrastructure in the academic and non-academic fields. The university is located on Campus II Jalan. Walanda Maramis No. 31, Nusukan, Kec. Banjarsari, Surakarta City, Central Java 57135. The problems that exist in this university's FKIP are that the concept of spatial organization is not yet optimal, the effectiveness of furniture organization is not fulfilled according to its function. Arrangement of visual design elements that are not yet optimal in supporting existing activities. One of the efforts to overcome these problems is by implementing a Behavior and Function approach that is oriented towards activities, behaviors, and functions. Therefore, the purpose of redesigning is to optimize the arrangement of spatial organization so that it affects the level of effectiveness both in activities and work. Additional facilities as facilities and infrastructure to support ongoing activities and activities. This study uses qualitative research by considering the need for more accurate and relevant data. In this research method, the existing information and data are expected to be able to provide the design desired by the client and several developments to achieve a level of comfort and optimization for future users.*
