

ABSTRACT

Pets are popular because in addition to being cute, they can be friends and can provide comfort and tranquility to their owners. Over time, there are problems that are often faced by pet owners, during the holiday season for cat and dog owners, where they experience difficulties when leaving their pets. This problem is obtained from the results of survey data conducted on several people who have pets.

Therefore, to deal with the problems often faced by pet owners when they want to leave their pets for a long time, namely with the MyAnimolz application for solutions to find pet care with the closest radius from where they live. Based on the results of application testing, the usability testing results obtained an average score of 91.7% from 19 respondents. These results show that the application built can be used easily and well.
