Art galleries are a place for artists to present their works of art to the public as well as to maintain the works as well as a means of entertainment and means of educating the public about science and the development of art. The designer of the Selasar Sunaryo art gallery in the city of Bandung refers to an exhibition of installation art and paintings located at Jalan Bukit Expert Timur no.100, Ciburial, Bandung, West Java, Indonesia to maintain the cultural heritage of the city of Bandung through building shapes, ornaments, sizes, materials, building construction and building interiors. The important thing to note in this design is a display presentation system that can increase the value of public appreciation. A circulation system that influences the flow of works of art on display and the need for room facilities for dynamic gallery activities to respond to needs and provide comfort for artists, visitors and managers. It is hoped that the design of the Selasar Sunaryo art gallery in the city of Bandung can become a creative, interactive exhibition space, and improve the function of the art gallery itself so that human needs in an art gallery are met and have a positive impact on the development of contemporary art in Bandung.

Kata Kunci : Art gallery, Selasar Sunaryo, Exhibition, Bandung.
