

## ABSTRACT

*Free association is an action or that is carried out by individuals or groups that are not controlled and not limited by applicable law. What's more, with the development of the era which has a great impact on human life, not a few have deviated from the existing norms. One of the cases that is rife now is LGBT, both outside and within the country. However, Indonesia as a Muslim country, of course it is not easy to accept deviations from the times and promiscuity, so many LGBT people hide their identities as part of the LGBT community. Normal humans certainly have a sense of taste which is difficult to hide, even if it's in a crowded audience, no matter how small it will be seen. Many of them will express their feelings when they are alone or with their fellow people because they feel safe and comfortable to show their true nature. From the conclusions above, the writer will visualize the feelings or feelings of an LGBT person within the scope of life in Indonesia. The result of this work will be in the form of an experimental film in which there is a combination of videography and symbols that represent the character of the actor.*
