Waste b3 that is a dangerous and poisonous substance of concentration, and its number can harm or pollute the environment. B3 waste is a serious problem for environmentalists and environmentalists especially authorities, as most large industries are not doing the right thing to manage the resulting waste because there are so few services. In big cities like Bandung the b3 waste of big industries cannot be ignored, as b3 is able to contribute to pollution. Consequently, fragrant light from the ciliary realm contributed to the responsibility of reducing its effects. The study aims to design the prototype design as information media by natural light liliary and also to educate about the dangers of b3 waste in hopes of making people aware of the dangers of b3 waste and recognizing potential side effects if the environment is contaminated by b3 sewage. This research is done in observation, research studies and interviews. From this research, the primary media that will be designed as a promotional tool as well as a prototype design design called prototype prototype prototype company profile He said the rupiah was expected to strengthen to rp9,100 per dollar in the Jakarta interbank spot market on Tuesday.

Key Word : B3 Waste, Customer, Media information, PT Cahaya Alam Siliwangi
