

ABSTRACT

Pasta Nafisa is one of the MSMEs engaged in the food & beverage sector which was established in early 2020, located on Jalan Babakan Ciamis IV No. 85 Dayeuhkolot, Bandung Regency. Given this, the owner of Pasta Nafisa chose to focus on making instant food, namely pasta. Given that where the owner lives there are not many sell pasta. Pasta sales are done through offline and online. Online sales are made by displaying e-commerce products and short messages from whatsapp, while offline sales are made by ordering at Pasta Nafisa store. In running its business, Pasta Nafisa often experiences difficulties in recording financial reports. The sales management process of Pasta Nafisa still uses a manual system. Which records all transactions using a book. This results in errors in recording and calculations. Therefore, a web-based application for MSME "Financial Statement and Sales Pasta Nafisa, Bandung" was created which is needed by Pasta Nafisa.
