ACKNOWLEDGMENTS

Assalamu'alaikum warahmatullahi wabarakatuh.

Alhamdulillah, all praise be to Allah SWT who has bestowed His blessings, giving the writer both physical and spiritual blessings in the form of time, health, thought and patience so that the writer can complete the preparation of writing this thesis.

I would first like to thank my thesis advisor Kemas Rahmat Saleh, Ph.D of the Computer Science at University of Aberdeen, United Kingdom. The door to Mr. Kemas office was always open whenever I ran into a trouble spot or had a question about my research or writing. He consistently allowed this paper to be my own work, but steered me in the right the direction whenever he thought I needed it.

I would also like to thank the experts who were involved in the validation survey for this research project: Head of Master of Informatics, Dr. Setyorini for her attention and facilities since the beginning. My thanks is also for Mrs. Ri Handayani for all of her answers and help with my study problem. Many thanks are also going to all the lectures of the program who share their knowledge and wisdom with me. Without their passionate participation and input, the validation survey could not have been successfully conducted.

I would also like to acknowledge to the nutritionists of the Padjajaran University as the data provider of this thesis, and I am gratefully indebted to his for his/very valuable comments on this thesis.

Finally, I must express my very profound gratitude to my parents, Drs. H.Hasanuddin Msi and Dra.Hj.Herlina for all the help in the form of prayers, guidance and support for me in my education at Telkom University and to all my friends from one alma mater Telkom university and overseas brothers and sisters at the South Sulawesi Student Dormitory Lontara Bandung for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them. Thank you.
