

LIST OF FIGURES

Figure 2.1	The concept of radar detection.....	9
Figure 2.2	FMCW radar diagram block for small displacement detection.....	11
Figure 2.3	Magnitude response to multi-point detection.	152
Figure 2.4	Phase response to multi-point detection.	155
Figure 3.1	Proposed Method System.	25
Figure 3.2	Detection process by radar system.....	26
Figure 3.3	Radar system.....	267
Figure 3.4	Data extraction diagram for small displacement profiles.	27
Figure 3.5	Laboratory experimental set-up.	29
Figure 3.6	Data processing scheme for single-point detection.	32
Figure 3.6	Data processing scheme for multi-point detection	33
Figure 4.1	Displacement profile with w is 6 and a is 1.	37
Figure 4.2	Magnitude response in multi-point detection simulation.	38
Figure 4.3	Phase response in multi-point detection simulation.	38
Figure 4.4	Displacement distribution profile when the load is at the sixth point. ..	399
Figure 4.5	Simulation results with varying displacement values.....	399
Figure 4.6	Simulation results when there is a load that moves.	40
Figure 4.7	Detection results with the influence of SNR.	40
Figure 4.8	Magnitude response from single point detection.....	42
Figure 4.9	Displacement detection result with 1 st procedure.	43
Figure 4.10	Displacement detection result with 2 nd procedure.	43
Figure 4.11	1 millimeter displacement distribution profile.....	44
Figure 4.12	2 millimeter displacement distribution profile.....	45

Figure 4.13 3 milimeter displacement distribution profile.....	45
Figure 4.14 4 milimeter displacement distribution profile.....	46
Figure 4.15 5 milimeter displacement distribution profile.....	46
Figure 4.16 Pasupati flyover test.....	48
Figure 4.17 Pasupati flyover test results.	48
Figure 4.18 1 st data result.	49
Figure 4.19 2 nd data result.....	50
Figure 4.20 BH317 test.	50
Figure 4.21 Displacement at 43.98°.....	51
Figure 4.22 Displacement at 56.98°.....	51
Figure 4.23 Displacement at 77.19°.....	52
Figure 4.24 BH837 test.	52
