ABSTRACT iv

ABSTRAK v

CONTENTS vii

LIST OF TABLES ix

LIST OF FIGURES x

1 INTRODUCTION 1

1.1 Background of the Problem . . . 1
1.2 Research purposes . . . 2
1.3 Statement of the Problem . . . 2
1.4 Hypotheses . . . 2
1.5 Research Method . . . 3
1.6 Problem Limitation . . . 3

2 LITERATURE REVIEW 4

2.1 Compressive Sensing (CS) . . . 4
2.1.1 *Sparsification* . . . 5
2.1.2 *Projection* . . . 6
2.1.3 *Reconstruction* . . . 8

3 RESEARCH METHODOLOGY 10

3.1 Research Methodology . . . 10
3.2 Research Flow Diagram . . . 10
3.3 Input Parameter . . . 11
3.3.1 *Physikalisch-Technische Bundesanstalt* (PTB) . . . 11
3.3.2 *MIT-BIH Arrhythmia Database* . . . 13
3.4 *calculations* . . . 15
3.5 *Sensing Matrix Modification* . . . 16
3.5.1 *Normal Distributed Random Numbers* . . . 16
3.5.2 *Circular Shifted Matrix* . . . 16
3.5.3 *Vertical Shifted Matrix* . . . 16

4 RESULTS AND ANALYSIS 18
4.1 Results of the Scenario 18
4.1.1 Entropy Calculation Result 24
4.1.2 Simulation Result on Dataset Physikalisch-Technische Bundesanstalt (PTB) 25
4.1.3 Simulation Results on MIT-BIH Arrhythmia Database 27

5 CONCLUSION AND RECOMMENDATIONS 30
5.1 Conclusions 30
5.2 Recommendations 30

BIBLIOGRAPHY 31
