

## ACKNOWLEDGMENTS

I want to start by expressing my thanks to the Almighty, for the continuous ease, blessings, and support I receive each day, including throughout the journey of working on my thesis. I would first like to thank my thesis advisor Mr. Isman Kurniawan, S.Pd., M.Si., M.Sc., Ph.D of the School of Computing at Telkom University that was always open whenever I ran into a trouble spot or had a question about my research. He consistently allowed this paper to be my own work, but always gave me advice in the right direction whenever he thought I needed it.

I would also like to express my appreciation to the experts who contributed to the validation survey for this research endeavor: Mr. Jimmy Tirtawangsa, Ph.D, Mrs. Arie Ardiyanti Suryani, Ph.D, Mrs. Irma Palupi, Ph.D. Their enthusiastic involvement and valuable insights were indispensable for the successful completion of the validation survey.

I would also like to acknowledge Angel Metanosa Afinda of the as the second reader of this thesis and my best friend, and I am gratefully indebted to her for her very valuable comments and help on this thesis.

Finally, I must express my very profound gratitude to my parents and my family and to my old friend for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them. Thank you.
