

LIST OF FIGURES

Figure 1. 1: The mindmap used in this thesis.	4
Figure 2. 1: Modern electrical planning structure.	6
Figure 2. 2: Electrical planning trilemma.	7
Figure 2. 3: Classification of load forecasting methods.	8
Figure 2. 4: Regular (left) and irregular (right) spatial units.	10
Figure 2. 5: The load growth follows the S curve.	10
Figure 3. 1: Load pattern in 3T island according to Gompertz Equation.	17
Figure 3. 2: Flowchart of spatial demand forecasting method for 2 models.	18
Figure 3. 3: The projection modeling stage using ArcGIS software.	19
Figure 3. 4: The stage of uncertainty testing of projections using Crystal Ball.	20
Figure 4. 1: The location of Bengkalis Island which borders the Malaka Strait.	23
Figure 4. 2: Real time Satellite Map of Bengkalis Island.	27
Figure 4. 3: ArcGIS Map of Bengkalis Island validated.	30
Figure 4. 4: Bengkalis Island spatial unit division.	31
Figure 4. 5: Land use on Bengkalis Island 2022.	41
Figure 4. 6: Land use changes on Bengkalis Island 2022 – 2042 and ultimate.	42
Figure 4. 7: The existing built-up area of Bengkalis Island in 2022 [21].	45
Figure 4. 8: Area increase evolution built on Bengkalis Island 2022 – 2042.	46
Figure 4. 9: Built-up area on Bengkalis Island in ultimate condition.	46
Figure 4. 10: The peak load projection for Bengkalis Island for 2022-2042 has not been validated.	52
Figure 4. 11: The peak load projection for Bengkalis Island for 2022-2042 has been validated.	54
Figure 4. 12: The peak load projection for Bengkalis Island for 2022-2042 is according to the Gompertz Equation.	55
Figure 4. 13: Projected peak load on Bengkalis Island according to the Gompertz Equation.	55
Figure 4. 14: The distribution assumptions of the projected peak load on Bengkalis Island are according to the Gompertz Equation.	56
Figure 4. 15: The sensitivity of the projected peak load on Bengkalis Island according to the Gompertz Equation.	57
Figure 4. 16: The location of Sebatik Island is on the border between Indonesia and Malaysia.	58
Figure 4. 17: Real time Satellite Map of Sebatik Island.	62
Figure 4. 18: Validated ArcGIS map of Sebatik Island.	65
Figure 4. 19: Sebatik Island spatial unit division.	66
Figure 4. 20: Land use on Sebatik Island 2022.	70
Figure 4. 21: Land use changes on Sebatik Island 2022, 2033, and ultimate.	71
Figure 4. 22: Evolution of the increase in area built on Sebatik Island 2022 – 2033.	74
Figure 4. 23: The area built on Sebatik Island is in ultimate condition.	74
Figure 4. 24: The projected peak load on Sebatik Island for 2022-2033 has not been validated.	78
Figure 4. 25: The projected peak load on Sebatik Island for 2022-2033 has been validated.	80
Figure 4. 26: Sebatik Island peak load projection for 2022-2033 according to the Gompertz Equation.	80

Figure 4. 27: Sebatik Island peak load projection according to the Gompertz Equation.	81
Figure 4. 28: The distribution assumptions of the projected peak load on Sebatik Island are according to the Gompertz Equation.	82
Figure 4. 29: The sensitivity of the projected peak load on Sebatik Island according to the Gompertz Equation.	82
Figure 4. 30: The location of Moa Island is on the border of Indonesia and Timor Leste.	83
Figure 4. 31: Real time Satellite Map of Moa Island.	87
Figure 4. 32: ArcGIS Map of Moa Island validated.	89
Figure 4. 33: The division of the spatial units of Moa Island.	89
Figure 4. 34: Land Use on Moa Island 2022.	94
Figure 4. 35: Land use changes on Moa Island 2022-2033 and ultimate.	94
Figure 4. 36: The existing built up area of Moa Island in 2022 [22].	96
Figure 4. 37: The expansion of the built area on Moa Island 2022-2033.	97
Figure 4. 38: The area built on Moa Island is in ultimate condition.	97
Figure 4. 39: The projected peak load on Moa Island for 2022-2033 has not been validated.	101
Figure 4. 40: The projected peak load on Moa Island for 2022-2033 has been validated.	103
Figure 4. 41: Projected peak load on Moa Island for 2022-2033 according to the Gompertz Equation.	104
Figure 4. 42: Moa Island peak load projection according to the Gompertz Equation.	104
Figure 4. 43: The distribution assumption of the peak load projection on Moa Island is according to the Gompertz Equation.	105
Figure 4. 44: The sensitivity of the Moa Island peak load projection according to the Gompertz Equation.	106
Figure 4. 45: The location of Rote Island is on the sea border between Indonesia and Australia.	107
Figure 4. 46: Real time Satellite Map of Rote Island.	111
Figure 4. 47: Validated ArcGIS map of Rote Island.	112
Figure 4. 48: The division of the spatial units of Rote Island.	113
Figure 4. 49: Land use on Rote Island 2022.	125
Figure 4. 50: Land use changes on Rote Island 2022, 2033, and ultimate.	126
Figure 4. 51: Evolution of the increase in area built on Rote Island 2022-2033.	129
Figure 4. 52: The area built on Rote Island is in ultimate condition.	130
Figure 4. 53: Rote Island peak load projections for 2022-2033 have not been validated.	134
Figure 4. 54: Rote Island peak load projection 2022-2033 validated.	136
Figure 4. 55: Rote Island peak load projection 2022-2033 according to the Gompertz Equation.	136
Figure 4. 56: Rote Island peak load projection according to the Gompertz Equation.	137
Figure 4. 57: The distribution assumption of the peak load projection on Rote Island is according to the Gompertz Equation.	138
Figure 4. 58: The sensitivity of the Rote Island peak load projection according to the Gompertz Equation.	138
