

ABSTRACT

Muhammad Shafy Putra, 1604204103, 2024, Visualization of "Intrusive Thoughts" in experimental film works, Faculty of Creative Industries, Fine Arts Study Program, Telkom University.

The making of this experimental film entitled Intrusive Thoughts is a film work that discusses intrusive thoughts, namely negative thoughts in the form of imagination or thoughts that are brutal, or appear in the form of violence, sexual, and create cognitive disorders that if followed will endanger others. This work is inspired by the phenomenon of intrusive thoughts in the journal "Journal of Obsessive-Compulsive and Related Disorders". This experimental film explores how intrusive thoughts can affect cognitive activity through symbolic and meaningful scenes. The film aims to raise awareness about intrusive thoughts, as a medium of expression and exploration to channel personal anxieties, and help people who experience Intrusive Thoughts to feel more understood and less alone. Experimental film is the medium chosen to raise and discuss this phenomenon. In the discussion of the work, the author will discuss the elements of experimental film, namely abstract form and associational form displayed through color, symbols, movement, music, and sound.

Keywords: Intrusive Thoughts, intrusive thoughts, cognitive impairment, experimental film.
