

ABSTRACT

Software applications play an important role in supporting government activities, including regional financial management in DKI Jakarta. Based on Governor Regulation Number 57 of 2022 and Government Regulation Number 12 of 2019, regional financial management often faces challenges with inconsistent and infrequently updated data recording, hindering financial planning, supervision, and reporting. To address this issue, the DKI Jakarta Government utilizes the SIPD web-based application from PT. Tabel Data Informatika. This application enables centralized, consistent financial data management and accelerates data updates, in accordance with Governor Regulation Number 142 of 2013 concerning the Regional Financial Management System and Procedures. The use of this application is expected to improve the efficiency and accuracy of regional financial management, support transparency, and facilitate coordination among SKPDs.
