

## ABSTRACT

*Artotel Kota Wisata in Cibubur is a hospitality proyek owned by PT Sahabat Kota Wisata and MARK Associates was commissioned to design the interior of the proyek. Located in the center of Kota Wisata, precisely at Living World Kota Wisata, the proyek occupies a strategic location around the business district. Artotel, managed by Artotel Group, features a boutique hospitality style by integrating service, art, creativity and cultural identity into the overall architectural design. With a focus on adventure-seeking visitors, Artotel aims to create a unique stay experience while introducing guests to local culture. The design method used in the MBKM Internship proyek "Designing Supporting Areas at Artotel Kota Wisata Cibubur" includes data collection from primary sources such as design briefs from MARK Associates and site survey results, as well as secondary sources in the form of literature studies, dimensional standards, scientific journals, and government regulations. The design concept of "Artistically Fused in Duality" is used to show that artistic value can emerge from the fusion of opposites, in accordance with the unique character of Artotel Kota Wisata. Meanwhile, the concept of "Harmony in Contrast: Where Urban Energy Meets Natural Serenity" was chosen to reflect Artotel Kota Wisata's strategic location between urban life and natural beauty. This concept creates harmony from the relationship of the two contrasting elements, illustrating the beauty of the blend created in the interior design of Artotel Kota Wisata, not least in the supporting areas which include typical Lift Lobby, typical Corridor, Prayer Room, Bar Toilet and Accessible Toilet.*

*Keywords: Boutique hotel, supporting area, Artotel, duality.*
