## LIST OF FIGURES

2.1	Overview of the human respiratory system . . . . .	7
2.2	ECG device setup and signal output . . . . .	8
2.3	LED & Photodetector (a) and Comparison of ECG & PPG signals (b) . . .	8
2.4	Capnography Device and waveform . . . . .	9
2.5	Illustration of a Ballistocardiography setup . . . . .	10
2.6	Infrared Thermography capturing respiratory patterns . . . . .	11
2.7	Type of radar technology . . . . .	12
2.8	Chirp Representation in Time Domain (a) and Frequency Domain (b) . . .	13
3.1	System design and flow . . . . .	17
3.2	Experiment setup for record RR . . . . .	26
4.1	Spectrogram of IQ Data from FMCW Radar . . . . .	31
4.2	Mean and Unwrapped Phase Data over Time . . . . .	32
4.3	Wavelet Transform . . . . .	33
4.4	Hilbert Transform for RR 15, 20, and 24 BPM . . . . .	34
4.5	Estimation using find_peaks for RR 15, 20 and 24 BPM . . . . .	36
4.6	Visualization of Data Merge and Split Process . . . . .	37
4.7	Bland-Altman Plot for RR Predictions . . . . .	40
