ABSTRACT **i**

CONTENTS **ii**

LIST OF FIGURES **iv**

1 INTRODUCTION **1**

- 1.1 Background 1
- 1.2 Problem Identification and Objective 3
- 1.3 Scope of Work 3
- 1.4 Research Methodology 4
- 1.5 Structure of Thesis 5

2 BASIC CONCEPT **6**

- 2.1 General Communications 6
- 2.2 Polar Codes 7
 - 2.2.1 Polarization with Bhattacharyya Parameter 7
 - 2.2.2 Polar Weight 8
 - 2.2.3 Polar Codes Encoder 8
 - 2.2.4 Polar Codes Decoder 10
- 2.3 Binary Phase Shift Keying (BPSK) Modulation 11
- 2.4 Orthogonal Frequency Division Multiplexing (OFDM) 12
 - 2.4.1 Cyclic Prefix 12
 - 2.4.2 Circulant Matrix and Toeplitz Matrix 13
- 2.5 Channel 14
 - 2.5.1 AWGN Channel 14
 - 2.5.2 Rayleigh Fading Channels 14
- 2.6 HAPS Communications 15
- 2.7 Construction D Lattice 16
 - 2.7.1 Construction D Generator Matrix 17

2.7.2	Encoding for Construction D	17
2.7.3	VNR and Channel Model	18
2.7.4	Decoding for Construction D	19
2.8	Bit Error Rate	19
2.9	Physical Layer Security	20
2.10	Outage Performance	21
2.11	Universal Software Radio Peripheral (USRP)	22
2.12	Simulink	23
3	SYSTEM MODEL AND THE PROPOSED METHODS	25
3.1	System Model	25
3.2	Broadband Channel	26
3.3	Polar Codes Lattices	26
3.3.1	Existing Polar Codes Lattices Design Method	28
3.3.2	κ Function	28
3.4	The Proposed Indonesia semi HAPS Channel Model	30
3.5	Proposed Security Schemes	30
3.5.1	Fixed frozen sequence	30
3.5.2	Dynamic frozen sequence	32
3.5.3	Frozen bits modes for dynamic frozen sequence	33
3.6	Simulation and Implementaion Scenario	34
3.7	Polar Codes Experiment Scenario	34
4	PERFORMANCE EVALUATION	39
4.1	Performance of Secure Polar codes in Power-Constrained Channel	39
4.1.1	BER Performance of Secure Polar codes in AWGN Channel	39
4.1.2	BER Performance of Secure Polar codes in Single-path Fading Channel	40
4.1.3	BER Performance of Secure Polar codes under Proposed HAPS Channel	41
4.2	FER Performance of Secure Polar codes in Additive Mod-2 Gaus- sian Noise (AMGN) Channel	44
4.3	BER Performance of Secure Polar codes in Real-Field	45
5	CONCLUSION	48
	REFERENCES	49
