

## ABSTRACT

*Firm value is the result of management's work in several dimensions, including net cash flow from investment decisions, growth and the company's cost of capital.*

*This research aims to explain and test the influence of financial performance, corporate governance and dividend policy on company value in basic industrial and chemical sector companies listed on the Indonesian Stock Exchange for the 2018-2022 period.*

*This research is quantitative research with purposive sampling technique as the sample selection method and the number of observations. The population in this study is the basic and chemical industry sectors listed on the Indonesia Stock Exchange for the period 2018-2022. The sample in this study was 32 companies with predetermined sampling criteria, namely the number of observations of 90 observations consisting of 18 companies with a period of 5 years. The data analysis method used in this study is descriptive statistics and panel data regression analysis.*

*The results of this study indicate that financial performance (return on assets), corporate governance (institutional ownership), and dividend policy (dividend payout ratio) simultaneously affect the company's value. Partially, financial performance (return on assets) affects the company's value. While corporate governance (institutional ownership) does not affect the company's value and dividend policy (dividend payout ratio) does not affect the company's value.*

*Keywords: Company Value, Financial Performance, Return on Asset, Corporate Governance, Institutional Ownership, Dividend Policy, and Dividend Payout Ratio*
