

## ***INTERIOR DESIGN OF BNI MULTIFINANCE OFFICE WITH WELL BEING AT WORK SPACE PSYCHOLOGY APPROACH***

### ***ABSTRACT***

*BNI Multifinance Office, established on April 8, 1983, focuses on the financing sector, including investment, working capital and multipurpose. With a vision and mission to create the best working conditions for employees, this office aims to be a place of pride in work and achievement. In the modern era, the demand for speed and efficiency in offices is increasing. Since most of human life is spent at work, creating a comfortable and productive work environment is very important.*

*This research focuses on the BNI Multifinance Office in Graha Binakarsa Building, South Jakarta, which faces problems such as sub-optimal circulation, inefficient furniture layout, and unattractive interior atmosphere. Although renovations were carried out in early 2023, there was still a lot of material damage in the office which resulted in a lack of comfort. The purpose of this research is to redesign the office interior to improve employee comfort and work efficiency. With this design, it is hoped that the resulting design can improve the work environment, make a positive contribution to BNI Multifinance, and add insight in the field of interior design.*
