

ABSTRACT

Chronolizer Sirah Nabawiyah is a website that contains the story of the Prophet Muhammad's journey during his life. Sirah Nabawiyah Chronolizer currently still does not have a dashboard admin page, therefore in this final project an interface design for the dashboard admin page using the Figma application with the design thinking method with the stages of empathize, ideate, define, prototype, and testing. After doing the prototype stage, the design that has been made will go through the testing stage using the User Experience Questionnaire (UEQ). The assessment using UEQ will be divided into 6 rating scales, namely attractiveness, clarity, efficiency, accuracy, stimulation, and novelty. From the UEQ benchmark calculations that have been carried out by 12 respondents, the results of the benchmark graph of "Excellent" attractiveness, "Good" perspicuity, "Excellent" efficiency, "Good" dependability, "Excellent" stimulation, "Good" novelty. From the test results it can be concluded that this final project succeeded in making the dashboard admin interface design structured, organized, and made it easier for users to manage data.

Keywords: Chronolizer Sirah Nabawiyah, dashboard admin, design thinking, User Experience Questionnaire, user interface.
