LIST OF FIGURE	x
LIST OF TABLE	xx
CHAPTER I INTRODUCTION	1
1.1 Background of the Problem	1
1.2 Problem Formulation	2
1.3 Objectives and Benefits	2
1.4 Problem Limitations	2
1.5 Research Contribution	3
1.6 Research Method.....	3
1.7 Research Methodology.....	4
1.8 Thesis Structure	6
CHAPTER II BASIC CONCEPT	8
2.1 Radio Detecting and Ranging (RADAR)	8
2.2 Radar Frequency Modulated Continuous Wave (FMCW)	9
2.3 Doppler Effect	12
2.4 Radar Drone	14
2.5 High-Pass Filter (HPF) in Respiratoion Detection Using Radar Drone	15
2.6 Scanning Method	16
2.7 State of the Art	18
CHAPTER III PROPOSED METHOD	26
3.1 Proposed Research	26

3.2	FMCW Radar to Detect Human Respiration Vital Sign Under the Ruins	27
3.3	Effect of Drone Height Fluctuation	31
3.4	FMCW Radar Drone to Detect Human Respiration Vital Sign Under the Ruins....	32
CHAPTER IV RESEARCH METHODOLOGY		38
4.1	Setup Experiment	38
4.2	Ruins modelling	39
4.3	Simulation Effect of Drone Height Fluctuation Modelling.....	39
4.4	Laboratory Experimental Fluctuation Model without Obstacle	40
4.5	Laboratory Experimental Fluctuation Model with Obstacle	41
4.6	Concept of Measuring Small Displacement Vital Signs with FMCW Radar Drone	42
CHAPTER V RESULTS AND ANALYSIS		44
5.1	Measurement Results with Simulation Models	44
5.2	Results of Laboratory Experimental Fluctuation Models without Obstacle	46
5.3	Results of Laboratory Experimental Fluctuation Models with Obstacle	49
5.3.1	Detection using Static Wood	49
5.3.2	Detection using Dynamic Wood	52
5.4	Results of Measuring Small Displacement Vital Signs with FMCW Radar Drone	55
BAB VI CONCLUSION		60
6.1	Conclusion	60
6.2	Suggestion	61
REFERENCE		62
APPENDIX A STATIC DATA		68
APPENDIX B DYNAMIC DATA		69
APPENDIX C MAGNITUDE RESPONSE OF LPF OUTPUT		71
APPENDIX D PHASE DETECTOR CUTOFF OUTPUT		83
APPENDIX E DETECTION RESULT		92
APPENDIX F BELT SENSOR OUTPUT		100
APPENDIX G HPF ORDE		114
