Quilting is an art that unites layers of fabric sewn together with the dakron that later forms ornaments with different variations of colors and different shapes. The development of quilting began to flourish in Indonesia is the majority of household products such as blankets, wall hanging, pillow gloves and other, Quilting has a variety of techniques, techniques patterns geometric shaped such as square, square Long, triangle, folded and application techniques. Quiltings techniques are still minimal on fashion products in Indonesia, especially patternes of geometrical stripes, but the development of Quirting abroad especially America has many quilters that produce fashion products with different techniques of geometry pattern, fashion products like jacket, vest, coat, overall and other. This research uses qualitative methods of literature study, interviews, observations, and exploration. The final result of this research is a fashion product that applies the technique of geometric stripes quilt.

Key Word : *Quilting, Geometris Stripes Quilt, Fashion Product*
