

ABSTRACT

Hafizh Nurfaizi. 1604204039, 2024, Portrait of Synergy Among Professions Through Photographic Installation, Faculty of Creative Industries, Fine Arts Program, Telkom University.

This final project report discusses how each job has synergy with one another, with the hope of eliminating the hierarchical thinking that exists around us regarding various professions. The art installation employs the concept of photographic installation, using puzzles as the medium, symbolizing harmony. The work also invites art enthusiasts to engage and participate in the piece.

The conclusion of this final project is that every job and the individuals who perform them share a common goal and are interdependent. They cannot perform their duties in isolation, requiring synergy among different professions to ensure their tasks are carried out effectively, thereby positively impacting their lives. Most importantly, the project aims to eliminate any perceived caste differences among professions.

Keywords: installation, puzzle, photography, profession.
