ABSTRACT

Toko Alat Musik Nada is a shop that sells various musical instrument parts. Because of this, the shop's finance department doesn't have an organized system. So, a web-based application was developed using the Laravel Framework and SQL Server Database. The design and development of this application utilized structured methods, including Unified Modelling Language (UML) and Entity Relationship Diagram (ERD). The development process involves requirements analysis, system design, implementation, and testing to ensure application meets the store's needs. This application is designed to record sales transactions also generate general journals and ledgers. The front of purpose for application is to improve efficiency and accuracy in the shop's financial and operational management.

Keywords: Musical Instrument, Web-Based Application, Sales.
