

LIST OF FIGURES

2.1	Polarization-Encoding BB84 Protocol in Classical QKD. . . .	11
2.2	Quantum Key Distribution (QKD) Manufacturers and Companies in several countries.	18
2.3	ID Quantique (IDQ) device from Switzerland.	19
3.1	Flowchart of the research on the design of practical quantum-based security for RAN fronthaul in 6G.	24
3.2	Grand Design QKDN Indonesia Emas 2045	25
3.3	Tree diagram of contributions from the review of various documents	26
3.4	The proposed design of Quantum-Based Security for 6G RAN.	27
4.1	Architecture of Hybrid QKD.	39
4.2	Key Takeaways from ITU.	40
4.3	QKD-secured mobile fronthaul.	40
4.4	6G Network Architecture and its components.	42
4.5	Comparisons table of technology provider based on different countries including: (i) network type, (ii) applications, (iii) key features, and (iv) implementation costs	43
4.6	Cumulative cash flow over 15 years.	57
4.7	Expected QKD system models for Indonesia Emas 2045. . . .	59
4.8	Timeline of expected Indonesia quantum networks deployment.	60
