

ACKNOWLEDGEMENTS

All praise and gratitude be to God Almighty, for His blessings and guidance that enabled me to complete this thesis entitled “Development of Human Activity Recognition (HAR) for Health Rehabilitation Using MMWAVE Radar with 3D Point Cloud Data.” This thesis is written as a requirement for the completion of the Master’s Degree Program in Electrical Engineering at Telkom University, Bandung. I fully realize that this thesis is far from perfect, both in terms of writing, language, and discussion, due to my limitations. However, I have done my best to ensure that this work can provide both theoretical and practical value. Therefore, I sincerely welcome any constructive suggestions and feedback for future research. This journey would not have been possible without the support and contribution of many individuals. I would like to express my deepest gratitude to:

1. Allah SWT, for His endless love, guidance, and forgiveness for all my shortcomings, and to Prophet Muhammad SAW, whose life continues to inspire me to strive to be a better person.
2. My beloved parents (Mamah and Bapa), for their unconditional love, prayers, encouragement, and unwavering moral and financial support. Thank you for your sacrifices, care, and wise advice that have been my strength throughout this journey.
3. My dearest grandparents, for their endless prayers, sincere love, and constant support that brought me peace and motivation with every step I took.
4. Dr. Ing Fiky Y. Suratman and Khilda Afifah, S.Pd., M.T., Ph.D., my supervisors — thank you for your invaluable guidance, knowledge, and support. I am deeply grateful for the time, effort, and thought you have given throughout this process. I sincerely apologize for any mistakes I may have made during our collaboration.
5. All lecturers of the Master’s Program in Electrical Engineering at Telkom University, for the knowledge and insights shared during my studies, as well as the administrative staff for their assistance throughout my academic journey.

6. All individuals whose names I may not be able to mention one by one, thank you for your encouragement, support, and contributions.
