

## LIST OF TABLES

2.1	Different Standards of the WLAN IEEE 802.11 . . . . .	14
2.2	MAPL Calculation . . . . .	17
2.3	LTE Resource Block Capacity . . . . .	18
2.4	Transmitter Antenna Gain . . . . .	19
2.5	Noise Figure for Up-link . . . . .	19
2.6	Receiver Body Loss . . . . .	20
2.7	Penetration Loss . . . . .	20
2.8	Shadow Fading Margin . . . . .	21
2.9	Propagation Model Parameters . . . . .	21
2.10	Bandwidth and Latency Requirements for Different Applications . .	24
2.11	RSRP Value Index . . . . .	26
2.12	RSRQ Value Index . . . . .	26
3.1	Regional Segments . . . . .	34
3.2	Clusterization by Subsegment . . . . .	34
3.3	Provider's Existing Sites . . . . .	35
3.4	Fiber Optic System Parameters . . . . .	40
3.5	Onboard Delay Parameters . . . . .	43
3.6	LTE Parameters Used for Passenger Communication . . . . .	44
3.7	Data Analysis Theory . . . . .	47
4.1	Segment Calculation Range . . . . .	51
4.2	Potential Roaming Points . . . . .	52
4.3	End-to-End: Backhaul to User Delay . . . . .	53
4.4	Onboard Delay Estimation for Each Carriage . . . . .	53
4.5	MAPL Uplink Calculation . . . . .	54
4.7	MAPL Uplink Calculation . . . . .	55
4.9	Propagation Loss Measurement . . . . .	56
4.10	Overlapping Coverage Measurement Parameters . . . . .	56
4.11	Additional Sites . . . . .	58
4.12	Train Passengers Estimation . . . . .	62
4.13	QoS Calculation Parameters . . . . .	62
4.14	Parameter for Latency Calculation . . . . .	63

4.15	Conditions During Drive Test Measurement . . . . .	64
4.16	RF Parameters Drive Test Measurements Result (per 5 minutes timestamp) . . . . .	64
4.17	RF Drive Test Measurement Results with Existing Sites . . . . .	69
4.18	Quality of Service Measurement Results . . . . .	71
4.19	Quality of Equipment Measurement Results . . . . .	72
4.20	4G Handover Drive Test Data . . . . .	73
4.21	Measurement Results for Drive Test and Optimized Subsegments: RSRP and RSRQ . . . . .	88
4.22	Measurement Results for Initial and Optimized Subsegments: Overlapping Coverage . . . . .	88
4.23	Parameter Used for Network Optimization . . . . .	90
4.24	X2 Handover Mechanism Test Results at 160 Km/h . . . . .	91
4.25	Comparison of Drive Test Results to NS-3 QoS Optimization . . . . .	92
4.26	Capital Expenditure for New MSC and Additional Sites Procurement	93
4.27	Operational Expenditure for New MSC and Additional Sites Procurement . . . . .	94
4.28	Total Number of Executive Train Units on the North Java Line . . .	94
4.29	Capital Expenditure for New Access Point Onboard Procurement . .	94
4.30	Operational Expenditure for New Access Point Procurement . . . . .	95
4.31	Revenue Share Percentage for Both Parties . . . . .	95
4.32	Revenue Projection for Both Parties . . . . .	96
4.33	Operational Cost and Ticket Price Increase Per Year (10 Years) . . .	97
