

LIST OF FIGURES

Figure 2. 1 Different Types of AUVs [9].....	6
Figure 2. 2 Control System Loops	7
Figure 2. 3 Transient Response of a Step Input [14].....	9
Figure 2. 4 PID Controller Block Diagram.....	11
Figure 2. 5 Examples of Buoyancy Engine Mechanisms [22].....	14
Figure 3. 1 Basic Buoyancy Engine System	17
Figure 3. 2 Complete Water Monitoring System.....	18
Figure 3. 3 Detail Water Monitoring System.....	19
Figure 3. 4 Submersible Unit Subsystem.....	20
Figure 3. 5 Submersible Unit Outer Design.....	21
Figure 3. 6 Submersible Unit Inner Design	22
Figure 3. 7 Submersible Unit Schematic.....	22
Figure 3. 8 Submersible Unit PCB.....	23
Figure 3. 9 Wiring Diagram of Submersible Unit.....	23
Figure 3. 10 Main System Flowchart.....	25
Figure 3. 11 PID Control System Flowchart.....	26
Figure 4. 1 Buoyancy Engine Mechanism	28
Figure 4. 2 Motor Position PID Control ($K_p = 0.25$).....	30
Figure 4. 3 Common Testing and Calibration Conditions	32
Figure 4. 4 Pressure Measurements at Different Depths.....	33
Figure 4. 5 Cascading PID Control Architecture	36
Figure 4. 6 Rope and Ruler Measurement Method and	37
Figure 4. 7 Counterweight and Total Weight of Submersible Unit	38
Figure 4. 8 Near-neutral Buoyancy of the Submersible Unit.....	39
Figure 4. 9 Near-neutral Buoyant PID Control.....	39
Figure 4. 10 Improved Submersible Unit Buoyancy	40
Figure 4. 11 Neutrally Buoyancy PID Control	41
Figure 4. 12 Measuring Depth with Rope and Ruler Method at 2 meters	43
Figure 4. 13 Proportional and Derivative Gain PD Control	45
Figure 4. 14 Different Setpoint PID Control.....	47
