

ACKNOWLEDGEMENTS

First and foremost, all praise and gratitude are dedicated to Allah SWT, whose endless grace, guidance, and blessings have enabled the author to complete this thesis and the entire journey of the Master's degree.

The author would like to express sincere appreciation and deep gratitude to:

1. Dr. Sofia Naning Hertiana, Ir., M.T., as the main thesis supervisor, for the invaluable guidance, encouragement, and constructive feedback throughout the research process.
2. Dr. Muhammad Imam Nashiruddin, S.T., M.T., as the co-supervisor, for the continuous support, insights, and advice that greatly contributed to the completion of this work.
3. All lecturers and staff of the Master of Electrical Engineering Program at Telkom University, for the knowledge, experience, and academic environment provided during the study period.

Special thanks go to the author's beloved parents and family, for their endless prayers, patience, moral support, and encouragement in every step of this journey. Their presence has been the biggest source of strength throughout this academic pursuit. The author is also thankful to fellow classmates, friends, and everyone who has contributed directly or indirectly to this research. Your support has been truly meaningful.

Finally, may this thesis be beneficial to the academic community and stakeholders in the field of telecommunication regulation and network planning, and may it serve as a foundation for further research and development.
