

ACKNOWLEDGMENTS

In the name of Allah, the Most Gracious, the Most Merciful. All praise and gratitude be to Allah SWT for His blessings and guidance, which have enabled the author to complete this thesis titled “**Two-Stage Semi-Supervised Co-Training for Enhanced Multi-Class Intrusion Detection**” as a requirement to obtain a Master’s degree in Electrical Engineering at Telkom University.

The author would like to express sincere gratitude to the individuals and institutions who have contributed to the successful completion of this research:

1. **Mr. S. Riady Sembiring** and **Mrs. R. Ritonga**, the author’s beloved parents, for their unwavering prayers, support, and encouragement throughout the author’s academic journey. Special thanks also go to the author’s two brothers, **Randi Saputra** and **Ricky Andriadi**, for their continued support and motivation along the way.
2. **Dr. Eng. Favian Dewanta, S.T., M.Eng.**, as the first supervisor, for continuous guidance, constructive feedback, and valuable insights that greatly contributed to shaping the direction of this research.
3. **Dr. Eng. Danu Dwi Sanjoyo, S.T., M.T.**, as the second supervisor, for additional perspectives and support during the development of this thesis.
4. All lecturers of the Master’s Program in Electrical Engineering at Telkom University, whose courses and advice have deepened the author’s knowledge and understanding.
5. The administrative staff of MTE for their assistance and dedication in supporting academic administration.
6. Colleagues and friends in the Master’s program: **Satria, Abbey, and Lutfi**, for the mutual support, discussions, and companionship throughout the study period.
7. Friends outside the academic environment, who brought balance and moments of relief during times of burnout, and provided support in different forms.

8. All parties, including those not mentioned above, who have contributed, supported, or encouraged the author during the writing and completion of this thesis.

May Allah SWT reward every act of kindness with abundant blessings. The author realizes that this acknowledgment may still miss some names due to human limitations, and for that, sincere apologies are extended. Hopefully, this thesis can be beneficial for further research and contribute to the field of cybersecurity and machine learning.
