

New Design of Integral Hidayatullah Elementary School in Depok with an Inclusive Design Approach

ABSTRAK

This research contains about the redesign of the Hidayatullah integral elementary school which has the purpose of redesigning to create an integral, safe, and comfortable school interior environment and is the main priority to create a friendly learning place for all its occupants. Therefore, school design planning must consider aspects of security, space efficiency, and the strength of the available furniture and facilities. This design not only aims to meet the functional needs of the school, but also to create an atmosphere that supports the formation of a loving and inclusive school, and can meet the needs of all students. The advantage of this design is the creation of a safe, comfortable, and efficient space, which supports the implementation of more effective learning activities in accordance with the inclusive education system. With this approach, the teaching and learning process can take place more optimally and contribute to the growth and development of students as a whole.

Keywords: inclusion, facilities, comfort & education.
