

ABSTRACT

This study aims to evaluate and assess the information security risks at the Communication and Information Agency (Diskominfo) of Subang Regency using the ISO/IEC 27001:2022 standard. Information security is a crucial aspect in protecting data and information systems in government institutions. The ISO/IEC 27001:2022 standard provides guidelines for implementing an effective information security management system. This research will analyze the policies, procedures, and controls in place at Diskominfo Kabupaten Subang to identify potential risks and measure the effectiveness of the implemented information security management system. The findings of this study are expected to provide valuable recommendations for Diskominfo Kabupaten Subang to improve risk management and ensure better information security.
