

## **ABSTRACT**

Information Technology rapidly developed makes significant changes in youth society. It becomes a new chance to provide a media that can guide, control, and direct youth's thoughts by following Information Technology development, through the internet as trendsetter of technology. By website, writer and guide lecturer try to provide counseling media for students.

Using PHP, MySQL, and Apache, writer designs website that can provide a place for effective counseling activity. In order to make an effective counseling activity, counseling needs analysis was done and implemented by web.

According to functional test result using WSOP software in thirty times experiment, we know that application of counseling web was succeed. Building on questioner result about needs, views, and contents of the web for thirty respondents, the result was 30% very satisfied, 50% satisfied, and 20% not quite satisfied.

**Key word:** Counseling Media, Web, WSOP, PHP.
