

ABSTRACT

ZIS Family of Islamic Education Foundation Haji Ne'an (YPIHN) is an organization that engages in charity care, and sodaqoh infaq YPIHN large family under the auspices of the Islamic Research Foundation Haji Ne'an (YPIHN) on Social Affairs and Welfare. Currently a wide range of activities and information held by YPIHN still can not be obtained easily, as well as the process of gathering the family ZIS YPIHN conducted each month is still done manually, by the way in coming to taip home by enumerator.

Based on the above issues, the author had the idea to create an application ZIS J2ME based on J2ME (Java2 Micro Edition) mobile. Of the application members can see the ZIS financial statements in general, reported the ZIS payment has been paid, see the full report ZIS payment, can also see information - information about the ZIS and the Foundation.

It is expected ZIS YPIHN can provide a good service, convenient, effective, efficient, which can be done anytime and anywhere without being limited by space and time.

Keywords : J2ME, Charity, Mobile.
