

## **Abstract**

District Purworejo pharmacies are pharmacies that provide health and medical services to the community and surrounding Purworejo. Pharmacies that sell drugs and assorted other necessities such as milk and others. They sell prescription drugs with or without a prescription. During this process transactions occurring at the pharmacy is still manual. Likewise, a process that occurs in the warehouse. Pharmacy will still make record drug data and the process of recording transactions manually. The absence of computerized systems in the calculation of drug stocks as a report so that report generation can only be done the end of each year.

Therefore designed a system of data management applications of drugs that aim to help facilitate the employee's store within a report. In addition, to help simplify the recording of data items that enter or exit the warehouse.

**Keywords:** drug, stock, warehouse, report
