

## Table of Contents

ABSTRACT .....	i
Prologue .....	iii
Table of Contents .....	v
Table of Figures .....	viii
Table of Abbreviation .....	x
Table of Epitome.....	xii
Glossary .....	xiii
Table of Appendix.....	xiv
Chapter 1 Preliminary .....	1
1.1 Background .....	1
1.2 Problem Formulation.....	6
1.3 Research Purpose .....	6
1.4 Problem Boundary.....	7
1.5 Research Benefits .....	7
1.6 Writing Systematic .....	8
Chapter 2 Basic Theory.....	9
2.1 Failure Pattern .....	9
2.2 Reliability, Availability & Maintainability (RAM) Analysis .....	10
2.3 Reliability .....	10
2.3.1 Exponential Distribution Function.....	11
2.4 Availability.....	12
2.4.1 Inherent Availability .....	12
2.4.2 Operational Availability.....	12
2.4.3 Exponential Availability Model.....	13
2.5 Maintainability .....	13
2.5.1 Repair Time Determination in OREDA.....	13
2.5.2 Analysis of Downtime .....	14
2.5.3 Measurements and Specification.....	15
2.5.4 Repair Time Distribution .....	16
2.5.5 Overhaul.....	16

2.6	Markov Analysis .....	17
2.7	Reliability of System .....	18
2.7.1	Serial Configuration .....	19
2.7.2	Parallel Configuration .....	19
2.7.3	Combined Series-Parallel Systems .....	20
2.7.4	k-out-of-n Redundancy .....	21
2.7.5	Load-Sharing System .....	21
2.7.6	Standby Systems .....	22
2.8	System Repair Time .....	23
2.8.1	System Having Redundant Components.....	23
2.8.2	State Dependent Systems With Repair .....	23
2.8.3	Standby System With Repair .....	24
2.9	Availability of System .....	25
2.10	Failure Mode and Effect Analysis (FMEA) Analysis .....	28
2.11	System Simulation Using Blocksim 9.0 Software .....	29
2.11.1	Reliability Block Diagram (RBD) .....	31
2.11.2	Block Properties .....	31
2.11.3	Universal Reliability Definition (URD).....	32
2.11.4	Spare Part Pool.....	32
2.11.5	Simulation Results .....	33
Chapter 3 Research Methodology .....		35
3.1	Conceptual Model .....	35
3.2	Problem Solving Systematics .....	37
3.2.1	Problem Identification.....	39
3.2.2	Data Collecting.....	41
3.2.3	Data Processing .....	41
3.2.4	Analysis.....	45
3.2.5	Conclusions and Suggestions.....	47
Chapter 4 Data Collecting and Processing.....		48
4.1	Data Collecting.....	48
4.1.1	General Description of Unit 4 Power Plant Kamojang Main System.	

4.1.2	Mean Time Between Failure (MTBF) and Mean Time to Repair (MTTR) Determination for each Equipment in Mechanical Plant Unit 4 PLTP Kamojang.....	59
4.1.3	Functional Block Diagram (FBD) Modeling .....	63
4.2	Data Processing .....	64
4.2.1	Developing the Equipment Configuration and FMEA (Failure Mode & Effect Analysis) of Unit 4 Power Plant Main Kamojang Main System. ...	64
4.2.2	Reliability Calculation Using Analytical Approach for Each Equipment.....	66
4.2.3	Availability Calculation Using Analytical Approach for Each Equipment.....	66
4.2.4	Maintainability Calculation Using Analytical Approach for Each Equipment.....	67
4.2.5	Simulation Using Blocksim 9.0 .....	68
Chapter 5	Data Analysis.....	80
5.1	Failure Mode and Effect Analysis (FMEA) .....	80
5.2	Equipment Configuration Analysis .....	80
5.3	Reliability for Each Equipment Analysis .....	81
5.4	Plant Availability Factor for Each Equipment Analysis .....	81
5.5	Maintainability for Each Equipment Analysis .....	82
5.6	Simulation Using Blocksim 9.0 Analysis.....	82
5.6.1	Reliability Block Diagram (RBD) Analysis .....	82
5.6.2	System Reliability Analysis .....	83
5.6.3	System Availability Analysis.....	84
5.6.4	Critical Equipment Analysis .....	85
Chapter 6	Conclusion and Suggestion .....	86
6.1	Conclusion.....	86
6.2	Suggestion .....	87
6.2.1	Suggestion for Company.....	87
6.2.2	Suggestion for The Next Research.....	87
References	.....	88
Appendix	.....	89
